Te Whare Wanaka O Puerua

This course involves both practical and theory and is focused on developing the necessary skills for improved livestock management.

What Will You Learn?

The course covers building a comprehensive animal health plan and investigates the theory of managing feed supply and demand.

Topics covered include:

- Vaccinating and drenching livestock
- Movement and handling of livestock
- Animal welfare and handling
- Rearing programmes for calves
- Calf housing and shelter
- Feeding requirements of young cattle
- Achieving liveweight targets
- Recognising ill health in livestock
- Disease prevention and treatment
- Feeding of livestock
- Conservation of feed surpluses

Course Delivery

Each course is delivered by specialist tutors who facilitate excellent learning opportunities using a variety of techniques including:

- Interactive and stimulating tutorials
- Practical tuition
- Group discussions
- Case studies from real life situations
- Up to date study guides

What Qualifications Can You Gain?

- Telford Certificate in Livestock Handling - Level 3
- These Unit Standards can be credited to a National Certificate.
