“ The market gave back some of the ground gained over recent sales, with the strong-wool sector using to feel the after-effects of the sharp June/July price movements. Buyers were cautious about making further commitments, and a larger-than-anticipated offering added pressure. As a result, the market has yet to establish a stable trading level.

In contrast, mid-micron and Merino wool attracted strong bidding, particularly for the better-style lots. Competition for this quality offering supported a high clearance rate within these categories, highlighting continued demand for well-prepared, superior-style wool despite the broader market uncertainty.

Dave Burridge, National Auction Manager
